I believe that the original patent (6,568,620) is partially inoperative by reason of the patentee claiming less than the patentee had a right to claim in the patent. At least one error in the original patent is described below.

Claims 18-39 submitted with this reissue application relate to a yarn feeder and method of making a yarn feed wheel for yarn feeders. Although the product and method as set forth in these claims are disclosed in the specification and drawings of the patent, they were not explicitly claimed in the original claims of the patent. As such, the original patent is at least partially inoperative.

All errors which are being corrected in the present reissue application to the time of filing of this declaration arose without any deceptive intention on the part of the applicant.

I declare that all statements made herein of my own knowledge are true, that all statements made on information and belief are believed to be true, that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
